

src/genericType/Localized
Object.h

```
graph TD; A[src/genericType/Localized Object.h] --> B[ofxMatrixEigen.h]; A --> C[cmath];
```

The diagram illustrates the dependencies of the header file `src/genericType/Localized Object.h`. It is represented as a gray rectangular box at the top. Two blue arrows originate from the bottom edge of this box, pointing downwards to two separate white rectangular boxes. The left arrow points to the box containing `ofxMatrixEigen.h`, and the right arrow points to the box containing `cmath`. This visualizes that the `Localized Object.h` file includes or depends on both `ofxMatrixEigen.h` and the standard C++ `cmath` library.
